

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A procedure to transmit information in connection with a telephone answering service which is provided by a ~~mobile~~ remote answer device in a mobile telephone system comprising:

connecting a calling subscriber to the ~~mobile~~ remote answer device when a called subscriber can not be accessed;

storing information that originates from the calling subscriber on the ~~mobile~~ remote answer device; and

transmitting a text message containing the stored information, in parallel to transmitting recorded speech messages from the calling subscriber, to the called subscriber when the called subscriber ~~requests~~ establishes a wireless connection to the ~~mobile~~ remote answer device to listen to recorded speech messages.

Claim 2 (Currently Amended): The procedure as claimed in claim 1, wherein the stored information includes the calling subscriber's number, which is transferred automatically to the ~~mobile~~ remote answer device.

Claim 3 (Currently Amended): The procedure as claimed in claim 1, wherein the stored information includes one message stored in advance at the calling subscriber ~~in advance~~ ~~stored message~~, which is transferred automatically to the ~~mobile~~ remote answer device.

Claim 4 (Currently Amended): The procedure as claimed in claim 1, wherein the stored information contains an optional number, which is transferred by the calling subscriber to the ~~mobile~~ remote answer device.

Claim 5 (Previously Presented): The procedure as claimed in claim 1, wherein the text message is connected to an application at the called subscriber's mobile terminal.

Claim 6 (Previously Presented): The procedure as claimed in claim 5, wherein the application connects a number with a telephone list.

Claim 7 (Previously Presented): The procedure as claimed in claim 1, wherein the text message is transmitted by a short text message service.

Claim 8 (Previously Presented): The procedure as claimed in claim 7, wherein the short text message service is an SMS (Short Message Service) or a USSD (Unrestricted Supplementary Services Data).

Claim 9 (Currently Amended): A method of transmitting information between a calling subscriber and a called subscriber in a mobile telephone system, comprising:
connecting a calling subscriber to a ~~mobile~~ remote answer device when a called subscriber cannot be reached;
storing information that originates from the calling subscriber on the ~~mobile~~ remote answer device; and

transmitting a text message containing the stored information, in parallel to transmitting recorded speech messages from the calling subscriber, to the called subscriber when the called subscriber ~~requests~~ establishes a wireless connection to the ~~mobile~~ remote answer device to listen to recorded speech messages.

Claim 10 (Previously Presented): The method as in claim 9, further comprising:
transmitting the text message as a SMS (Short Message Service) or as a USSD (Unrestricted Supplementary Services Data).
